

Advance Medical Designs, Inc. (AMD), was founded in 1984 entering the marketplace as a quality manufacturer and distributor of disposable medical devices.

AMD has a tradition of superb craftsmanship and leadership in new product development and quality individualized customer services.

AMD is poised for exciting growth, new challenges and many opportunities in the medical device industry, both domestically and internationally.

Our Mission

Our attitude of “**Quality First, Service Always**” has been a cornerstone of our business, motivating all employees from production, to managers, to top executives.

We consistently strive to provide our customers with quality products. We will continue to innovate, improving upon designs and processes in order to exceed customer expectations and to respond to their changing needs.

Advance
Medical Designs, Inc.

“The Advance Room Turnover Infection Control System (A.R.T) is the disposable answer for today’s O.R.”

There are several benefits of using the A.R.T System. Infection control techniques will be improved, cross contamination will be minimized, O.R. equipment will be protected, and it will help ensure the hospital is up to JCAHO, AORN, and OSHA standards.

Our Advance Medical Sales Professional will provide a comprehensive analysis of your current O.R. turnover procedure at no cost to the hospital. The analysis addresses, in detail, existing infection control protocols, materials cost, and turn-around time. AMD will also provide recommendations which will improve overall efficiencies and reduce cost.

Additional benefits of A.R.T. include enhanced fluid management, standard of care for each patient, and custom designed kits. Disposable linens, bags, wipers, and mops can be included in each individually packaged kit and are designed to fit the unique needs of each hospital.

Our system offers hospitals the opportunity to participate in our Value Added Goods program. We provide SMARTGuard™ patient positioning and pressure relief gels, various style hampers, storage containers, and mop handles all at no additional cost to the hospital.
