GELITA®
MEDICAL

Complete Care! Completely Safe!

No moistening before use necessary

Ideal for irregular structures

Combinable with active ingredients

Very easy peel and tuft

Handling & Application

- ✓ Good elasticity compared to other fibrillar hemostats when wet. Product can be stretched to cover wound surface and does not tear
- ✓ Very good to fill cavities because of its flexibility & very easy to wrap around vessels

High efficiency, easy handling and fast hemostasis

GELITA TUFT-IT® is the worlds first gelatin-based fibrillar for controlled hemostasis. It assists surgeons to stop capillary, venous and arteriolar bleeding effectively when conventional methods are ineffective or impractical.

The patented gelatin fibrillar combines the positive characteristics of a gelatin-based hemostat with the easy and convenient handling of a non-woven material.

- ✓ NATURAL & FULLY BIODEGRADABLE
- ✓ EASY HANDLING
- ✓ STOPS BLEEDING EFFICIENTLY
