

Foam Headrest Pads Single Use

DELTA

Adult Pad

**Product Code
D-2001**

DELTA

Paediatric Pad

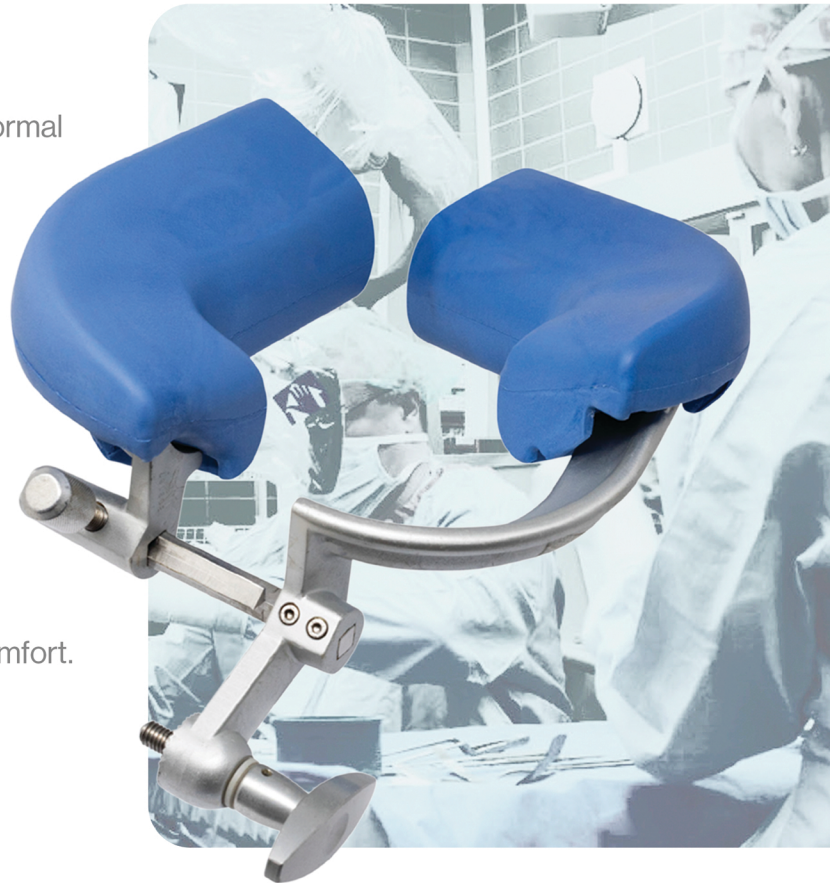

**Product Code
D-2002**

Delta Surgical are pleased to offer Neurosurgeons our single-use horseshoe headrest pads in both adult and paediatric sizes.

Designed by experienced professionals, these pads address the conventional in-use disadvantages of normal gel pad products. These include pad detachment, unwanted patient contact with metal support frames, undesirable head movement during procedures and potential patient cross-contamination from gel pad leakage.

The unique CE marked headrest pads are easy to set up and their special interaction with the frame ensures the pads are held securely and in the correct position for the duration of even lengthy surgery.

Manufactured from a special breathable foam they offer patient benefits in terms of both contact and comfort.

Key Features

- Fast, simple and convenient product set-up
- Stability of pad position & retention during surgery
- No potential product leakage of Gel
- Non-irritant breathable foam to maximise comfort
- Low cross contamination risk between patients
- CE marked, cost effective and available ex-stock
