INNOVATIVE SURGERY

Made
in
Germany

The only comprehensive product assortment for ultrasonic tumour aspiration

LEVICS ultrasonic aspirator:

Excellent instrument design for precise working

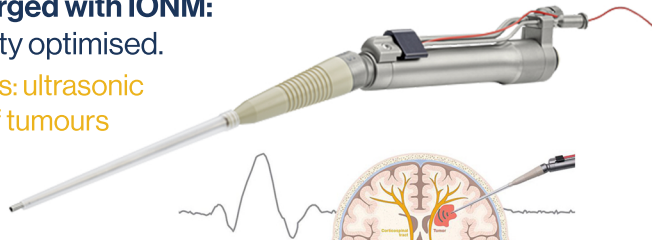

The low weight supports a safe working over long periods of surgery while the angled instrument ensures an optimum view of the surgical field.

LEVICS ultrasonic aspiration merged with IONM:

Clinical outcome maximised. Safety optimised.

The combination of two technologies: ultrasonic aspiration and IONM for resection of tumours near the corticospinal tract.

ENP Endoscopic Micro instrument:

Advanced neuroendoscopy with ultrasonic aspiration

The world's only endoscopic ultrasonic aspirator for the unique resection of intraventricular tumours and cysts.
