

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.

Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022 (01/01/2022 to 31/12/2022)	
Additional Details relating to the Baseline Emissions calculations.	
Delta Surgical has no prior emissions reporting. We have tracked our 2022 carbon footprint as a baseline for future benchmarking.	
Delta Surgical are committed to reducing emissions to net zero by 2050.	
In order to continue our progress to achieving Net Zero, we have adopted carbon reduction targets as detailed in this plan.	
We project that carbon emissions will decrease by 8% each year to achieve net zero by 2048.	
Our Scope 3 emissions have not been included as they have not previously been reported on. They will be included in the 2023 baseline year emissions report.
